

Customer Journey Map

FitBuddy – AI-powered personalized fitness planning

Date	15 March 2026	Team ID	SWTID-2026-8154	Project Name	FitBuddy
------	---------------	---------	-----------------	--------------	----------

Map the customer’s experience stage by stage, capturing actions, service touchpoints, thoughts and feelings.

Journey area	Stage 1 Discover & Create Plan	Stage 2 Give Feedback & Adjust	Stage 3 Follow & Track Progress
Actions <i>What does the customer do?</i>	• Opens FitBuddy and enters age, weight, fitness goal and preferred intensity. • Submits details to generate a plan. • Reviews the 7-day workout and nutrition tips.	• Uses the feedback form to describe difficulty or preferences. • Submits feedback using the user ID. • Checks the revised workout plan.	• Returns to FitBuddy to follow the plan and track progress. • Uses the updated plan for workouts. • Continues the fitness routine with tailored guidance.
Touchpoints <i>Where does the customer interact?</i>	• FitBuddy home page and input form. • Generate Plan button and result page. • Personalized workout and nutrition tips.	• Feedback page and text box. • Submit Feedback form. • Updated plan and confirmation message.	• Saved user profile and plan records. • User/Admin page to view plans. • Original and updated plans stored in SQLite.
Customer thoughts <i>What is the customer thinking?</i>	“What details do I need to enter?” “Will this plan match my goal?” “Can I follow this day by day?”	“This workout is too hard or easy.” “I want the plan adjusted to my needs.” “The revised plan should suit me better.”	“I can keep improving consistently.” “My feedback has been considered.” “I can refer to my updated plan.”
Customer feelings <i>How does the customer feel?</i>	Curious and hopeful. Interested and motivated. Encouraged and confident.	Concerned or dissatisfied with the difficulty. Involved and heard. Relieved and supported after revision.	Motivated. More confident. Satisfied and engaged.

Service Ownership & Improvement Opportunities

Who supports each stage, and what can be improved for the customer?

Journey area	Stage 1 Discover & Create Plan	Stage 2 Give Feedback & Adjust	Stage 3 Follow & Track Progress
Process ownership <i>Who is in the lead?</i>	Frontend: captures user details and displays the generated plan. Backend/API: validates inputs and requests the plan from Gemini.	Frontend: collects and submits feedback. Backend/API + Gemini: processes feedback and generates the revised plan.	Backend/database: stores user details and plan history. Admin: reviews users and plan changes.
Opportunities <i>How can we improve this stage?</i>	• Add clear examples and input guidance. • Validate entries and show helpful error messages. • Display workout and nutrition sections clearly. • Offer safe, achievable guidance and a simple weekly layout.	• Make feedback prompts specific to difficulty and preferences. • Confirm feedback receipt and explain that the plan is being updated. • Show original and revised plans side by side. • Retain plan history for reference.	• Provide simple progress tracking and consistency reminders. • Improve revisions using user feedback. • Let users easily review saved plans. • Give admins a clear view of users and plan changes.

FitBuddy project focus: Generate a personalized 7-day fitness plan, use customer feedback to adjust the plan, and help users continue with clear workout and nutrition guidance.
